- ❑ No partial fills.
- ❑ EA trading facilities.
- ❑ Micro lots available.
- ❑ Advanced Technical Analysis with 50+ Indicators.
- ❑ Trading Signals.
- ❑ Exceptional charting capabilities.
- ❑ Multilingual setup options available.

Installation on Windows

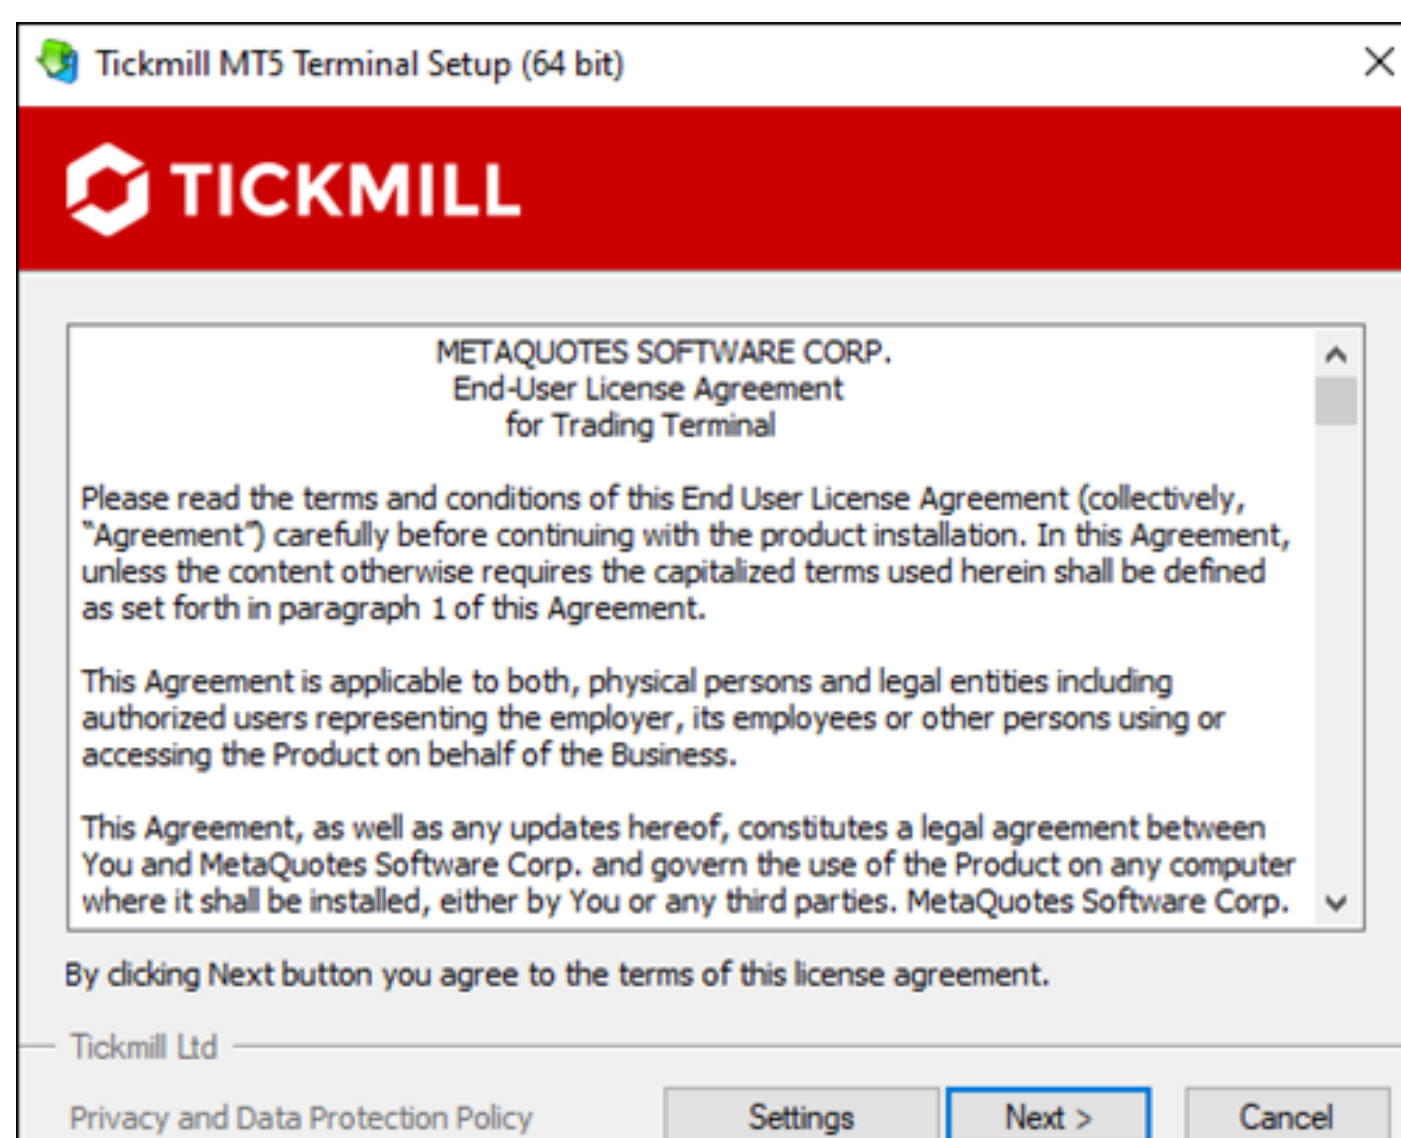

This guide will quickly explain the installation procedure of the MetaTrader 5 terminal for Windows.

1. First of all, simply download the platform by clicking [here](#). A **pop-up** will appear asking if you'd like to run this file. As shown below, simply click **'Run'**.

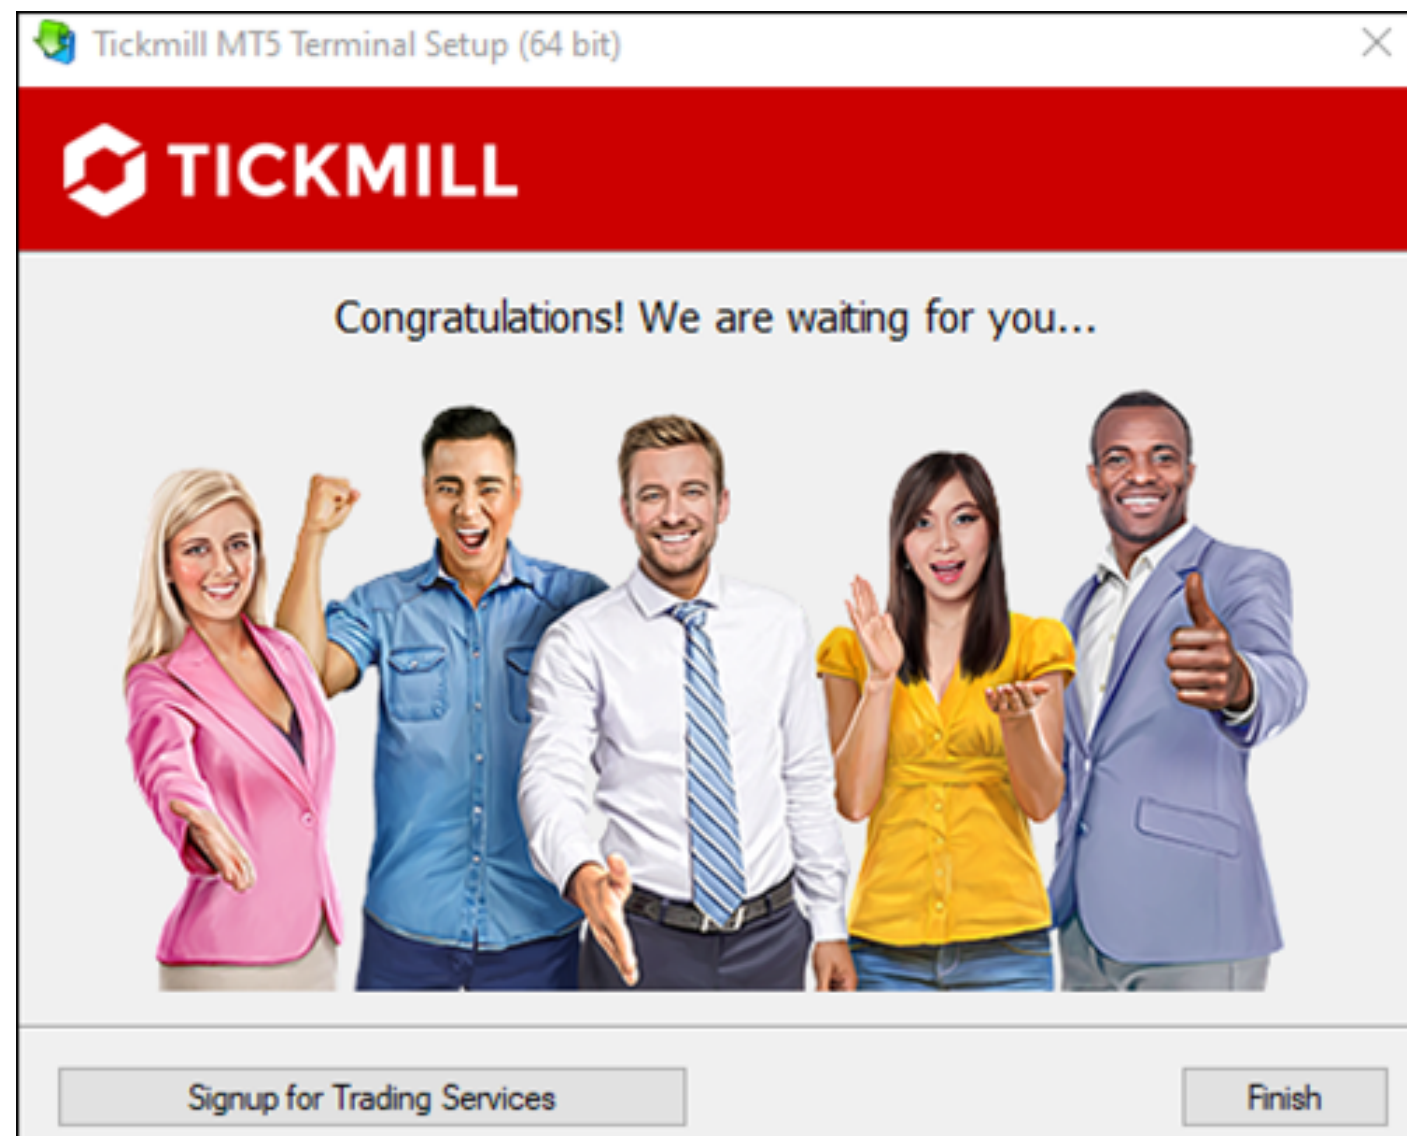

2. Your download will then begin. Once the download is complete you need to launch the installation by **double-clicking the programme setup**.

A new **pop-up** will appear with a **'Welcome to Tickmill MT5 Terminal Setup!'** message. Click **'next'** to be taken to the next screen.

3. You'll see the download finish and will then be presented with a '**Congratulations! We are waiting for you**' screen, as shown below. Simply click **finish** and your MT5 platform is ready to go.

A shortcut will be created on your computer and the programme should automatically launch once you have clicked finish. If it does not automatically launch, simply **double click on the shortcut** created and the MT5 terminal will open.

If you experience any issues, simply click [here](#) and send us an email. We are more than happy to help!
